1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-18, 20, and 21, drawn to a method of removing fibrous shells from cereal grains, classified in class 426, subclass 482.

II. Claim 19, drawn to a method of using said treated cereal grains, classified in class 426, subclass 506.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions relate to different modes of operation: the first group is involved with treating cereal grains; the second group is involved with employing a portion of the cereal grains to produce a slurry used in making glucose syrup.

3. Because these inventions are distinct for the reasons given above and the search strategy required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
